

Horse Boot

The Davis Horse Boot is ideal for continuous soaking when conditions such as abscesses, thrush, puncture wounds and other aggravated foot conditions exist. The boot also relieves pressure when signs of bruises, corns or cankers appear. The soft pliable upper comforts the leg during use and closes tightly just below the fetlock.

The boot opens wide for easy on-off application. The durable triple-layered bottom is made of a tough polyvinyl compound making it reusable many times over.
