

Does your dog bark at visitors? Does your dog bark when you're not at home? Is the noise annoying your family and neighbors?

Each year thousands of dog owners are needlessly forced to part with their pets because of barking problems.

There are different levels of nuisance barking depending on the breed of dog, its personality, its age and other factors. No matter what kind of dog you own, excessive barking can be a major annoyance for your family and neighbors.

If you want your dog to stop nuisance barking, there is a solution--**ABS Anti-Barking System**.

This revolutionary product combines high-tech electronics with proven Pavlovian behavioral principles.

The **ABS Anti-Barking System** has undergone clinical studies by major American and European universities and been found to be highly effective. With the **ABS Anti-Barking System** you will simply and painlessly condition your pet to stop nuisance barking when the collar is worn.

"I am very pleased with ABS Anti-Barking System. I've used it with great success with several of my clients' dogs. Companion-dog owners who would never accept any other type of anti-bark collar have no qualms about using yours." - T.M., Connecticut dog trainer

Here's how it works: Each time your dog barks, the bark-sensing unit releases a brisk citronella spray in front of the dog's snout. **Your dog hears it, sees it, feels it and most importantly, smells it.** At the first spray of citronella, your dog's natural curiosity will be to seek the origin of

the new odor. The dog will very quickly learn that when it barks **ABS Anti-Barking System** sprays!

Through this conditioned response, ABS discourages your dog from barking.

Research shows that the ABS Anti-barking System significantly reduces nuisance barking and is considered the most effective, humane solution to this persistent problem. The citronella spray is a harmless distraction to your dog's bark stimulus and is safe for dogs, people and the environment.

"...I didn't think there was any help out there for my bark-at-anything Sheltie...but this collar really works well and continues to work!... It has brought us not only peace, but peace of mind because it's safe!" - J.E., New Jersey dog owner

stop nuisance barking

the humane Anti- Barking System

Easy to Use

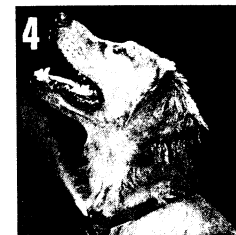

1 Fill the Unit

2 Test it by blowing on microphone

3 Strap it to the dog

4 Sprays when dog barks

The dog may resume its normal bark behavior when the ABS device is removed.

Each Kit Contains

Anti-Bark device, adjustable collar (up to 24"), can of citronella, two 6 volt alkaline batteries and detailed instructions. The device weighs approximately 2.5 oz. and can be worn by dogs of all sizes.

Results of the ABS Anti-Barking System Study

88.9% of owners reported satisfaction.¹

"Overall, ABS is a welcomed addition to our anti-barking armory. It has excellent potential for dogs which do not respond to conventional training techniques. They're not afraid of it... it works so quickly."

*-Amy Marder, VMD, Animal Behavior Consultant
Angell Memorial Animal Hospital, Boston, MA*

"The ABS™ is the most humane, effective bark control system available. Properly used, it provides the necessary reinforcement for successful bark control. Animal Behavior Systems, Inc. fully guarantees the ABS from mechanical defects. It does not guarantee the individual's success. That depends largely upon the individual's compliance with instructions and the stimulus for the dog's behavior. In cases of non-effective control, (less than 15%) it is recommended that a certified animal behavior specialist or trainer be consulted.
