X Soft - 50%

Soft - 42%

Med Soft - 8%

Effects of Weather

Cold weather relaxes fibers causing ropes to soften. Hot weather tightens fibers causing ropes to harden. Try a softer lay for warmer weather and a firmer lay for cool weather.

Importance of buying in Season

Because weather changes affect ropes, weather dictates the way ropes are manufactured. The amount of twist put into ropes and the kick (the amount that the rope pushes out at the bottom) are adjusted for different seasons.

Type of Cattle

Pick a softer lay for small horn cattle and a stiffer lay for bigger cattle. Special Note: Most of our Pro Ropers carry both kinds in their bags, so they can be ready for any situation.

Proper Break-In

Give a rope 5 stretches and roll it up to set for 24 hours before next use.

FIND THE ROPE THAT'S RIGHT FOR YOU IN 4 SIMPLE STEPS.

Classic® and Rattler® have cracked the code to finding the right rope, regardless of your style or brand preference. No more guessing or bad tips. Here's the secret to roping satisfaction. Simply answer four key questions and you'll find the right rope for any circumstance.

HEELERS

1	What size rope do you like in your hand? Simply choose the size rope you prefer and move to Step 2.	Small	Medium	Large
		S	M	L

2	What kind of weight do you like to feel in your swing? Now take your rope size and move across the chart to the weight you're most comfortable with. Make a note of the letter designation (S-1, M-3, etc.).	Light Weight	Medium Weight	Heavy Weight	
		S	S-1	S-2	
		M		M-2	M-3
		L			L-3

3	What kind of feel do you like in your swing and delivery? Find your letter designation from Step 2 and move across this chart to your preferred rope feel. You're sure to find a rope that fits your needs! ■ Classic® Ropes ■ Rattler® Ropes	When you deliver your rope, you finish aggressively.	When you deliver your rope, you back off your swing to control your loop.	
		S-1	XR4® 3/8" Lite	Gold 3/8"
		S-2	XR4® 3/8" or Powerline 3/8" Lite™ or GT4™	
		M-2	Bullseye® 3/8"	MoneyMaker 3/8" or Platinum 3/8" or Rainbow 3/8"
		M-3	Powerline™ 3/8"	Crossbred 3/8"
		L-3		MoneyMaker 3/8" Full

NOTE: If you fall in between, try 1 lay softer with an aggressive rope.

4	What lay is right for you? One other factor to consider is the lay. Use this chart to help you make the most informed choice.	Statistics	Effects of Weather	Importance of buying in Season	Proper Break-In	Changing from 3-strand to 4-strand
		Med Soft - 20%	Cold weather relaxes fibers causing ropes to soften. Hot weather tightens fibers causing ropes to harden. Try a softer lay for warmer weather and a firmer lay for cool weather.	Because weather changes affect ropes, weather dictates the way ropes are manufactured. The amount of twist put into ropes and the kick (the amount that the rope pushes out at the bottom) are adjusted for different seasons.	Give a rope 5 stretches and roll it up to set for 24 hours before next use.	If you normally use a 3-strand rope and are trying a 4-strand for the first time, you should try one lay softer than you normally use. 4-strand ropes have more body in the tip than 3-strand ropes, so a softer lay in your hand will still yield the same body of a harder lay.
