

SAV-A-HOOF MED-I-SOLE

“Sticky” Gel formula bonds to hoof

Performs better than *runny* liquid preparations

Make your own medicated hoof packing!

Med-i-sole is an effective treatment for infections of the hoof, sole and frog, including white line disease, candida yeast, seedy toe, and stubborn thrush. The unique gel formula sticks to the sole, shoes and pads. It lasts longer than liquid preparations with less waste. Wood, leather, and synthetic pads can be pretreated with Med-i-sole. Recycle scrap urethane foam into an effective medicated hoof packing.

Product characteristics

- Sticky gel formula
- Less waste
- Bonds to hoof
- Long lasting
- Reduces reinfection
- Neutral PH
- No formaldehyde
- Non caustic
- Non acid
- Antiseptic barrier
- Environmentally safe
- Economical
