

GLU-Coat is formulated with a high unique blend of sugars which can increase appetite and palatability. GLU-Coat also contains Cell-rate® "from the makers of Cellarator® which aids in the process of cellular replication, supports the animals immune system, helps animals get through stressful periods, and aids in muscle and fat development. Fish oil is also formulated in GLU-Coat because it contains the highest levels of Omega 3 Fatty Acids which helps maintaining a bright shiny hair coat. GLU-Coat can also increase glucose levels which is stored in the body as fat, giving livestock that bloomier, fuller, softer look that is demanded in the show ring today.

ANALYSIS

Sugar	42%
Fat	3.0%
Protein	4.0%
