It's Fly-Proof and Horse-Proof!

Actually Stays On Horse
Cool & Comfortable Fit
Really Keeps Flies Off

Patented Design Protects Eyes From: Fly Irritation • Disease • Flying Dust, Dirt, Debris

AT LAST! A HORSE FLY MASK THAT REALLY WORKS!

Engineered to the conformation of the horse's head, SUPERMASK is the first mask successfully designed to stay on the horse. The first virtually problem-free fly mask that's highly effective on all types of horses, whether stabled or pastured. With no obstruction of vision, no rubbing or harsh abrasion. Just a snug, yet comfortable fit. Readily accepted by horses and so durable, it often lasts through several fly seasons.

Directions For Use: Start with throat latch open. Grasp ear and forelock opening at top of mask and gently pull down over horse's ears. Reach under horse's neck and bring the right side of the throat latch over to meet the left side of the closure.

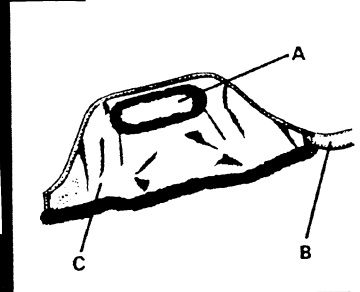

Attach snugly, then check for comfort and safety. Adjust if necessary.
NOTE: When removing, undo the throat latch gently. The ripping sound might startle your horse and make him jump.

For Best Results:

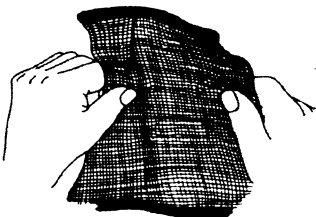

- Remove mask nightly and check horse's face and eye condition.
- Wipe face area with cool cloth.
- Rinse mask weekly.
- Check fur trim periodically for trapped burrs or irritating foreign objects.

Use It:

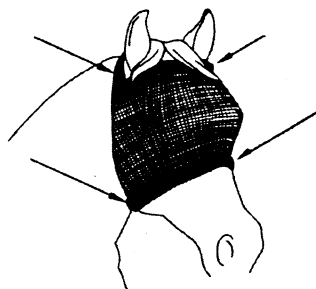

- To keep flies away from eyes
- To protect eyes while trailering
- To aid healing after eye injuries
- As a sun screen
- To aid in reducing the spread of summer sores by *Habronema* larvae
- To protect eyes from flying dirt and debris

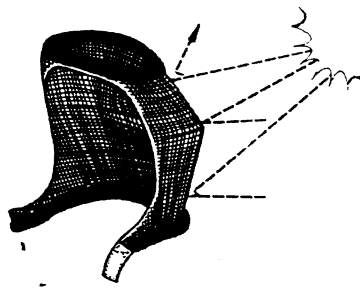

- A. Generous ear and forelock opening for comfort & coolness
- B. Throat latch closure provides 10-1/2" adjustability for ideal fit
- C. Completely washable

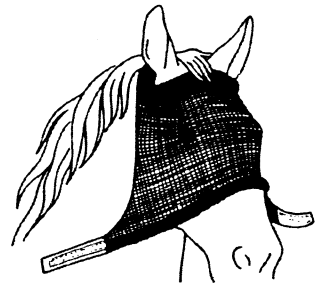

You absolutely can't tear it — just try!
Abrasion resistant — 290 lb/psi tensile strength — it's horseproof!

Fleece-lined ear opening and nose band conform snugly to keep flies out! Cool and comfortable on the horse.

Blocks the sun — provides 73% shade, yet horses see out clearly! Ultra-violet inhibitors curb material breakdown from sunlight.

Thousands of satisfied users report: It really stays on the horse! Plus, break-away throat latch releases with pressure for the horse's safety.
