

Caution:
This product is not suitable for animals that chew electrical cords.

THERAPEUTIC PET BED

INSTRUCTIONS FOR USE - Please read carefully

Congratulations on your therapeutic pet bed purchase. Your pet will receive a gentle radiant heat that will keep it warm and deliver therapeutic benefits for any muscle and joint conditions. Don't forget to tell all your animal loving friends about the new Thermotex line of therapeutic pet beds.

You will find that after as little as two weeks use, the older animal will gain agility and be more playful as the therapeutic heat helps your pet with conditions such as arthritis. Initially, you may find that your pet spends more time in the bed as well due to the great level of comfort that they receive.

HOW TO USE YOUR PET BED

Your pet bed is very simple to use.

Simply plug the bed into any 110 volt outlet and turn the bed on the **Low** setting. That is all you have to do. The pet bed uses very little power and will cost around 7 cents on the low setting for a 24 hour period. Thermotex pet beds are not to be used on the **High** setting. The low setting provides the best therapeutic benefit. It may take your pet a couple of days to get used to using the new therapeutic pet bed. This is normal.

Washing Instructions

The cloth liner is washable as is the bed itself. Before washing or dry cleaning the bed you must remove the electrical pad by opening the convenient Velcro closure, and removing the white insert. Make sure Velcro opening is closed. Bed should be washed in lukewarm water and left to air dry. Do not use automatic dryer. Place white insert back into the bed with the stamped side facing up.

Important Safety Instructions

- Do not immerse the bed in water unless the electrical pad has been removed.
- Do not use pins or other metallic objects to hold bed cover in place.
- Never use pad without outer cover in place.
- Occasionally check the inner PVC around the heat pad to ensure that it has not deteriorated over time.
- Do not fold or bend the heat element.
- Do not pull the pet bed by the cord or use the cord as a handle.
- Do not use the bed with any type of liniment, salve or ointment.
- Pets should always have the option to move off the bed if desired.
- Do not use on the High setting.

Heat Tolerance

Most animals have different heat tolerances and you will need to experiment with the bed to see what your pet likes best. Always start on the low setting only with no extra lining inside the bed other than the liner that comes with the bed. If your animal finds the bed a bit warm, add an additional liner about the same weight as a regular bath towel. This will lower the surface temperature of the bed making it suit your pet but will not alter the therapeutic effect of the bed. You will soon become aware of your pet's preference.

One Year Limited Warranty

WARRANTY: The Company warrants this product, to the original purchaser or gift recipient, to be free from defects in workmanship and materials under normal use and service, for a period of one year from the date of purchase.

We would appreciate photos or comments about our new therapy beds. Please send any information to sales@thermotex.com

Here are the kinds of comments pet owners are saying about our new Thermotex therapeutic pet bed.

- ❖ The bed is like a day at the spa. She is very relaxed and is much more mobile.
- ❖ My cats and French bull dog loved the heat!
- ❖ My dog seemed more relaxed after using the bed.
- ❖ My pet became more active after using the bed.
- ❖ My older cat became more active and playful after using the bed. She was able to jump more easily.
- ❖ My cat warmed both sides and even her back with the bed and loved it! Very Zippy after using the bed.
- ❖ Our pet is much more nimble when he rises from the bed.
- ❖ My cat used the bed constantly and I noticed that she was not limping as she did prior to using the bed.
- ❖ Our pet literally lived in the bed and used it almost constantly.
- ❖ Our 20 year old cat has trouble moving and after using the pet bed, was jumping up on the furniture again!
- ❖ Our pet loved the bed and actually was snoring when she slept.
- ❖ My 16 and 15 year old cats loved the bed and literally used it 24/7.
