**DOG  
WATERER**

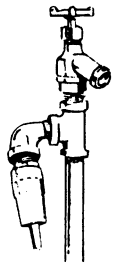

Best Possible Pet Care

FAST, EASY  
TRAINING

**ALWAYS FRESH, CLE**

**DOG  
WATERER**

**HOW IT WORKS:** Your dog simply licks or nudges the lever control and refreshing, clean, sanitary water flows directly into their mouth. Shuts off automatically.

**ASSURED SAFETY:** No accidental water bowl spilling. No depletion. No evaporation. No contamination. Protects your dog from thirst, dehydration and communicable disease.

**EASY TO INSTALL:** Attaches by hand to your outdoor faucet or end of garden hose. Can be permanently installed in the supply line with a thread adapter (see illustration).

**NO MAINTENANCE NEEDED:** Saves you time, worry, work and frustration. Proven long-term performance. Millions now in use.

**FAST, EASY TRAINING**

Simply install your Dog Waterer and demonstrate it to your dog by moving the lever control and letting water trickle out. Most dogs will immediately lick the dribbling water, nuzzle the lever, and start drinking. If not, wait several hours and demonstrate again. During this waiting period, remove all available water. Leave the Dog Waterer loosely attached so that the water seeps past the threads and slowly drips. This dripping water will attract your pet back to the waterer for "self training." In rare cases, you may need to smear peanut butter, or other attractant on the lever to entice them to lick it. Tighten securely when training is assured.

**5-YEAR WARRANTY**

This product is guaranteed free of MANUFACTURING DEFECTS for five years from purchase date. Simply return defective unit (with dated proof of purchase) prepaid to LIXIT for free replacement. Enclose \$2.00 to cover cost of postage and handling. Not responsible for damage caused by freezing or water deposits.
