

DIRECTIONS FOR USE

⚠ WARNING

To avoid potential eye injury and cuts and burns to your body, read and follow the enclosed safety precautions insert before using flexi leash.

SAFETY LOOP: Always use the enclosed safety loop ② in addition to your dog's collar ① as illustrated. If your dog's collar breaks, the safety loop will stay attached to your dog. This will prevent the leash from retracting unexpectedly and the hook ⑧ from possibly hitting you in the eye.

TO ATTACH LEASH: Be sure to have your dog under control before attempting to attach the leash. With the leash fully retracted into its case, put the safety loop ② around the dog's neck near the collar. Attach both rings of the safety loop ② and the dog's collar to the hook ⑧ on the leash.

TO OPERATE: Hold the flexi leash by the handle ③, not the cord ⑥. The cord ⑥ will run in and out freely without sagging.

TO STOP LEASH: Press the brake button ④ down firmly.

TO SET BRAKE LOCK: Press the brake button ④ down firmly and push the locking pin ⑤ in.

TO RELEASE BRAKE LOCK: Press the brake button ④, push back the locking pin ⑤, then slowly release brake button ④.

TO WALK TO HEEL: Use the brake lock ⑤.

TO BRING YOUR DOG NEARER: Extend your arm towards the dog, apply the brake ④ and bring your arm to your side again. Release the brake ④ and repeat the movement as necessary.

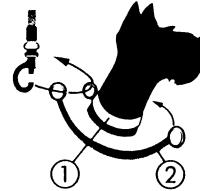

FOR CLOSER CONTROL: Use the nylon hand loop ⑦ provided on the leash. Do not grab or pull on the cord ⑥.

TO DETACH LEASH: Before attempting to detach leash, be sure your dog is under control, the leash is fully retracted, and the brake is locked.

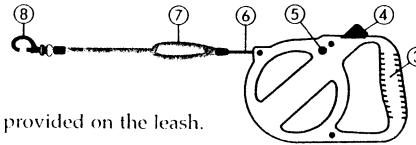

WET CORD: If the cord ⑥ gets wet, pull it out of the casing as far as it will go, lock brake and leave it to dry overnight. Keep it out of reach of children.

LIMITED WARRANTY:

This flexi retractable leash (including all parts) is warranted by the manufacturer, Bogdahn Technik GmbH, for a period of one year from the date of purchase to be free from defects in materials and workmanship (see insert for details).
