

Care and Use

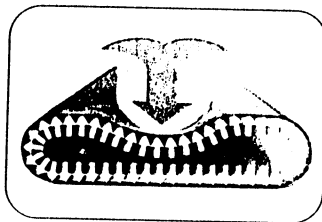

Congratulations on your purchase of the UltraSoft™ Gel Pad, the finest pad on the market. Follow these instructions and your UltraSoft™ Gel Pad will last for years!

- Insert the UltraSoft™ Gel in the specially designed pockets in the pad.
- Avoid contact with sharp objects or abrasive surfaces.
- Remove gel inserts from the pad before washing. Wash pad frequently with soap and warm water. Use disinfectant if pad has been used over an open wound.
- Do not leave gel inserts in direct sunlight.
- The UltraSoft™ Gel inserts can be warmed by placing them in hot water or cooled by placing them in a refrigerator.

The GEL Advantage!

UltraSoft® Gel is the result of 30 years' experience and leadership in the sports medicine and rehabilitation fields. Since creating the first gel to prevent sores, our research team has developed hundreds of products now in use worldwide. Among these is our gel saddle pad. Since the performance of horses is affected by many factors, including saddle sores, our line of gel saddle pads enhances comfort and performance for horse and rider.

- Lessens risk of injury to the horse's back when ridden by a novice
- Reduces impact on horse's back, especially when jumping
- Protects the horse's back and withers
- Improves saddle fit on narrow horses
- Aids in the schooling of a young horse
- Reduces back sensitivity - may be warmed before use
- Offers improved protection over existing/previous injury

How it works

As the load forces pressure on the UltraSoft® Gel pad, the pressure is absorbed and redistributed over a greater surface area, thus reducing high-pressure points. The gel even has the remarkable ability to diffuse sheer forces.

Caring for your Pad

Congratulations on your purchase of the UltraSoft® Gel Pad, the finest pad on the market. UltraSoft® Gel was developed by a sports medicine specialist with over 30 years' experience in the sports medicine and rehabilitation fields. Follow these instructions and your UltraSoft® Gel Pad will last for years!

- Insert the UltraSoft® Gel in the specially designed pockets in the cloth cover.
- Avoid contact with sharp objects or abrasive surfaces.
- Remove gel inserts from the cloth cover before washing. Wash pad frequently with soap and warm water. Use disinfectant if pad has been used over an open wound.
- Do not leave gel inserts in direct sunlight.
- The UltraSoft® Gel inserts can be warmed by placing them in hot water or cooled by placing them in a refrigerator.

GUARANTEE

WRS guarantees the gel against defect or failure for up to one (1) year from date of purchase. You may return it with proof of purchase to the manufacturer for a replacement.
