WEBBING AND BUCKLES
DETACH
FOR EASY CLEANING

The SMx Roper Cinch™ is made of the highest quality neoprene, webbing and stainless steel buckles. The webbing and neoprene are removable for easy maintenance. The four-way stretch textured neoprene grips without slipping, yet moves with the horse. Chafing, soreness and aggravated skin are eliminated due to sweat

acting as a natural lubricant, without it being absorbed into the neoprene. The SMx Roper Cinch™ doesn't need to be applied as tight as conventional products, and is ideal for training, showing and competition.

We do not necessarily recommend machine washing your products. Hand washing with mild soap and air drying reduces wear and tear. Damage from washing machine agitators is not covered under warranty.
