

W/TEC BACK RISER PAD WHITE  
WEATHERBETA USA INC. (SUSA AU)  
PAD101V 300 28186  
Customer Code: 657210

***Raised back for improved saddle fit.  
Helps prevent pressure points and sore backs.  
Increased comfort for freer movement.  
Fully moulded conforming shape.  
Why would anyone ride without one?***

- ★ Assists in achieving correctly balanced saddle fit where extra height is needed at the back of the saddle.
- ★ Moulded shape ensures pad does not ride back or slip.
- ★ Moulded chamber clearance ensures air flow and no pressure points on wither or spine.
- ★ Tapered edge ensures smooth finish on the horse's shoulder – no lump or pressure point.
- ★ Highly resilient foam ensures dramatic shock absorption qualities.
- ★ Ideal for everyday use and very advantageous in high shock situations, such as Jumping, Endurance, Polo, Cross Country and extended sitting trot sessions.
- ★ Provides a level of comfort and trauma-reduction that cannot be built into any saddle.

Do not expose pad to temperature in excess of 70°C or moulding quality will be affected, e.g. closed boots, rear car parcel shelves, in direct strong sunlight.
