

Now you can remount on the trails
without having to worry about
finding a picnic table, bench, fallen
tree to be able to reach your stirrup.
No need for another rider to give
you a helping lift up.
Easy and portable.

Ride with the knowledge
that you can remount easily

WISE'S WESTERN MOUNT AID

INSTRUCTIONS

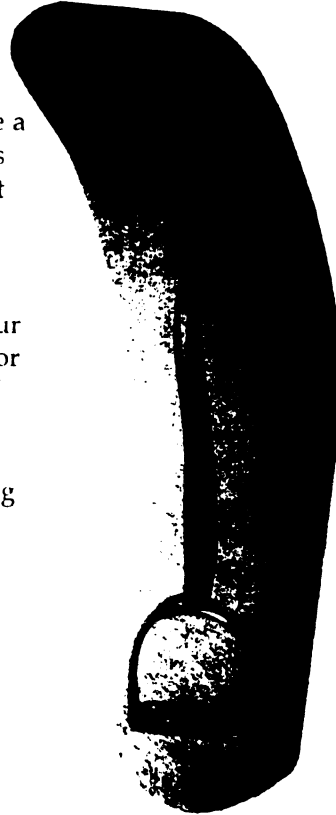

Place loop of mounting strap over your saddle horn positioning the mounting strap to the right of your saddles fender & stirrup.

Adjust the length of the mounting strap no longer than necessary to be a comfortable step-up to your saddles stirrup. Make sure your adjustment is securely fitted into the buckle.

When ready to mount, instead of using your left foot to start, take your right hand and position on saddle for balance as you are facing the seat of the saddle.

Place your right foot in the mounting aids stirrup and quickly lift up to place your left foot in your saddle's stirrup. Release you right foot to swing over the saddle and mount.

Once in the saddle you must pull up the mount aid and secure it in a saddle bag or pouch or roll up and secure to your saddles tie straps.

For mounting purposes only.
