

# Rope Halter with Lead Rope

*R-u Horse Tack & Equipment Co.*

## Description:

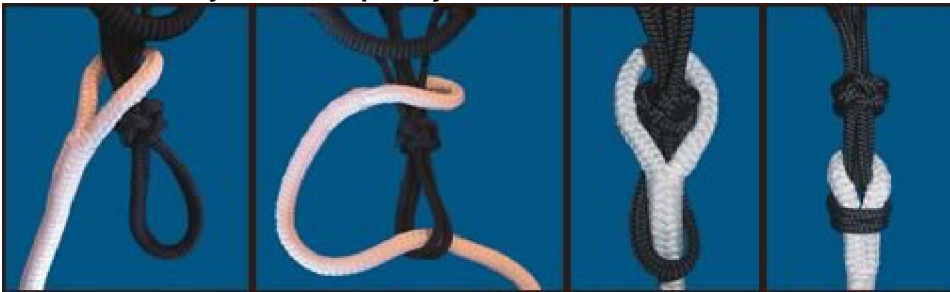

Halter: Made of 5/16" Double Braided Polyester Rope, this halter is soft, pliable and durable. It is tied with traditional overhand knots in all locations except the top of the lead loop which has a fiador knot for size adjustment. The halter incorporates two unique R-u Horse features:

- A coiled nose band of 3/16" double braided polyester rope which wraps the two noseband strands of 5/16" rope for extra comfort.
- A lockstitch of braided artificial sinew securing the two 5/16" rope ends at the tie end of the halter.

Lead Rope: Made of 9/16" Double Braided Polyester Rope, this lead has a weight and feel that lets you know you're in communication with your horse. While many rope construction braids pick up hay and ground debris easily, you won't find that to be the case with our double braided design. The lead incorporates two unique R-u Horse features:

- The leads are "eye spliced" with a 3 1/2" inside diameter loop on one end for easy attachment to the halters without additional hardware. Can also be attached with a snap of your choosing.
- A lockstitch of braided artificial sinew securing the cut end of the lead.
