Because PEOPLE Care About ANIMALS

Put an end to needless animal drowning

## New Product Announcement

Skamper-Ramp® US PAT # 6643878

The great little water escape ramp for pets and other critters.

### Winner of the “Pool and Spa News” Reader’s Choice Top 50 Award

Last year in the U.S. over **5000** family pets drowned needlessly in swimming pools and walled lakes, along with **countless millions** of other creatures – raccoons, possums, squirrels, rabbits, chipmunks, mice, etc.

**THE PROBLEM:** When a pet or other animal jumps or falls in a pool, walled lake or pond, they have no trouble swimming for a while but, without a way out, they eventually drown from exhaustion. Though drownings occur by day, they occur most often at night leaving the pool owner or lakefront resident with that cruel “morning surprise” of a dead pet or wild animal.

### **THE SOLUTION:** Skamper-Ramp®

Skamper-Ramp® provides animals with a way out of their water entrapment.

Skamper-Ramp® works – it saves lives.

Skamper-Ramp® provides 24/7 peace of mind – it’s ready to save animals and keep your pool clear.

This simple white, corrugated, hi-tech plastic ramp attaches to the side of the pool, walled pond, dock, or even boat. Because all living beings see 550nm (white), they can see it, day or night, and they “skamper” out on the ramp.

When folks are swimming, you can just flip it out, remembering to “plop” it back in when the swim is over.

Skamper-Ramp® and Skamper-Ramp® Big Dog™ are simple, inexpensive solutions. No more morning surprises. No more needless animal drownings with Skamper-Ramp® on duty.

Skamper-Ramp® – It works – It saves lives.

## Skamper-Ramp®

### Specs and Fact Sheet

**Materials:** 8mm hi-tech, white, box-corrugated polyethylene ramp with nylon rope, nylon fasteners, and stainless steel D-rings for attaching.

**Weight:** Skamper-Ramp® - 2 lbs boxed  
Skamper-Ramp® Big Dog™ - 3 lbs. boxed

Master Packs are 8-unit boxes – (mixed or all one kind) – 26”x14”x17” at approximately 19-28 lbs (depending on content.)

**Size:** Skamper-Ramp® - 25” x 13” x 5”  
Skamper-Ramp® Big Dog™ - 40” x 13” x 5”  
The ramp starts off 24” wide from wing tip to wing tip, and is 13” wide after assembly.

**Attachment:** We suggest attaching the ramp to the pool’s deck with the stainless steel d-ring clips and rope provided. There are two sets of holes in the ramp for threading the rope through, in order to have a snug fit to the wall (whether under a deep coping or with a negative edge.)  
Some people choose to use existing pool cover anchors, or water leveler covers, rather than drilling into their deck.  
The ramp should float/hang in the water at approximately a 30-degree angle so that the ramp’s “nose” is submerged.  
Lead plug anchors with stainless steel screws are suggested for solid decks.  
Stainless steel bolts and nuts with a lock washer are suggested for hollow decks.  
Directions for assembly and attachment are provided with every Skamper-Ramp®.

**Vinyl Liner Pools:** Skamper-Ramps® are designed to keep an animal’s claws from slashing the plastic walls of vinyl liner pools as they escape. The curved ends are designed to protect, not puncture, the vinyl liner. For extra buoyancy you can use “noodle” sections attached with plastic tie-downs. Also to minimize rub, you could tape the edge of the ramp that will be closest to your wall with duct tape or waterproof vinyl pool tape.
