

Single Tie Enduro-Balanced Ride Rigging Directions:

- A. Drop tie strap from front rigging dee and run through the back of the western girth buckle.
- B. Come out through front of girth buckle and go back to the rear rig slanted dee. Feed the strap from front to back, towards the horse's body.
- C. Come out of the back of the rear slanted dee and go back down to the girth.
- D. Feed the strap through the back of the girth buckle and behind the previous wrap. Push girth buckle tongue through holes in strap.
- E. Put any excess strap length through slotted keeper.
