How does BioPet know which breeds are present in my dog?

What is the Ancestry Analysis Certificate?

Why are several breeds listed on my Ancestry Analysis Certificate, and what do the levels mean?

- Level 1:
- Level 2
- Level 3
- Level 4
- Level 5:

What if there are breeds in my dog that are not in your database?

BioPet DNA Breed Identification Test

Can I collect the DNA myself?

Does DNA collection hurt my pet?

How long does it take to get the results?

Will you be adding more dogs to your database?

Can you confirm that my dog is pure bred?

# Instructions For Use

*Please read instructions completely before collecting your sample.*

*If submitting samples for more than one dog, repeat steps 1 through 7 for each dog separately. Be sure to avoid any sample cross contamination, and correctly label the envelope for each swab. Each dog's sample must be submitted in a separate envelope to avoid cross contamination.*

**Please allow 7-10 days for your sample to arrive at our lab. Processing time from this point will be 2 weeks.**

*Your dog's Ancestry Analysis Certificate and Breed Behavior, Health and Personality Summary will be mailed to you within two weeks after receipt of your sample. ●*
