

## How Bye Bye Odor Works

Bye Bye Odor™ is a safe and highly concentrated microbial solution that is capable of reducing or eliminating a wide range of organic odors associated with animal waste and urine. Bye Bye Odor microbes, when wet, consume or breakdown the urea and other organics that cause the unpleasant smell and unhealthy ammonia build up from confined animal urine and waste. Bye Bye Odor is not a cover up, rather an odor eliminator.

Spray Bye Bye Odor in livestock and pet areas where urine and feces odors persist. Bye Bye Odor is great to use in animal bedding areas, kennels, cages, holding pens, fair arenas, trailers, trucks, barns, stalls, petting zoos, sales rings, etc. Bye Bye Odor also works great inside your home for removing pet urine odors from carpet or furniture. Test in an non-obvious spot first.
