- Split Easy Open Tailgate
- Right Side Exit (Side Exit)
- Easy Adjustable Floor Width
- Available Trailer Kit
- 5 Year warranty

Description: S2000 Self-Catch Chute W/ Stabilizer (Order #002-52500)

The S2000 is the latest generation of the Self Catch series from Powder River. The self catch headgate is designed to allow cattle to catch themselves in the headgate and permitting an operator to work the alleyway in a shorthanded situation. The Stabilizer secondary head catch works to control the head by catching cattle again by the shoulders, elongating the neck, and providing superior head control.

The new self-catch headgate design offers advantages of a low profile floor and extra wide opening. The center squeeze utilizes rack and pinion mechanisms that aid in keeping operator and animal away from moving parts and dangerous linkages. Mechanical advantage on the lever releases for the center squeeze and the headgate make releasing animals easier than ever. The tailgate linkage allows operation from the front or rear of the chute and a side exit release is included on all 2000 series Powder River chutes. The new low profile floor adjusts easily from 15.5" to 6.5" width.

Physical Dimensions:

Total Weight: 1777 lbs.
