- Mantener alejado la luz. - No congelar.
- Una vez abierto mantener en condiciones refrigeradas.

Sólo para uso en animales. Mantener fuera del alcance de los niños.

Attain™

**Concentrated colostrum bioactives
for newborn calves**

Net contents: 250 mL (8.4 fl. oz.)

Attain is a trademark of Agri Laboratories, Ltd.
Manufactured by La Belle Associates, Inc.

Attain™ Colostral Bioactives

Intended to supplement the bioactive components found in maternal colostrum.

Feeding Recommendations

Newborn Calves: Feed 10 mL orally immediately following birth or as soon as possible thereafter. Feed an additional 10 mL on days two and three, for a total of three consecutive days.

Attain can be fed orally alone or in maternal colostrum, colostrum supplement and replacer, or milk replacer. Attain is intended for use in conjunction with colostrum management programs.

Becerras recién nacidos: Administrar 10 mL por vía oral inmediatamente después del nacimiento o lo más pronto posible. Administrar 10 mL adicionales al segundo y tercer día.

Attain puede administrarse solo por vía oral, en el calostro materno, en un suplemento y sustituto de calostro, o en un sustituto de leche. Attain está previsto para utilizarse en conjunto con los programas de administración de calostro.
