

Espree® Natural Oral Care Gel for Cats

Espree Animal

Removes Plaque & Tartar Without Brushing
Freshens Breath
Supports Healthy Gums

Veterinarian Formulated
NO BRUSHING

With Salmon Oil

Espree Natural Oral Care Gel breaks down and removes plaque and tartar, freshens breath and works under the gum line to support overall oral health.

INGREDIENTS: Water, Grain Alcohol, Xanthan Gum, Cod Liver Oil, Salmon Oil, Peppermint Oil, Grapefruit Seed Extract, Grape Seed Extract, Thyme Oil and Neem Oil. Preservatives added.

EASY TO USE:

Removing Build-up: Apply twice daily until plaque & tartar have dissolved. Noticeable results in 14-30 days. Results may vary.

Keeping Teeth Clean: Apply once daily, two to three times per week.

Apply recommended amount of gel into cat's mouth, directly on the gum line, if possible, to speed results. Even wiping gel on the outside of your cat's mouth or top of paw will work as they will lick it off.

AMOUNT TO USE EACH SIDE OF MOUTH:

Cat under 12 lbs	2-3 drops
Cat over 12 lbs	3-4 drops

FOR BEST RESULTS:

Withhold food and water for at least 30 minutes after application. While toothbrushing is not required, it can speed up results.
