Aid your pet in fighting off the symptoms of pain, inflammation, stress, anxiety

CannaLove CBD K-9 Soft Chews provide the naturally occurring complex of cannabinoids found in Hemp, which may provide your pet with the Entourage Affect required to support proper cannabinoid intake. Doctor formulated and developed to aid your pet in fighting off the symptoms of pain, inflammation, stress, anxiety, and other age and injury related conditions, CannaLove CBD K-9 Soft Chews are the ideal source of Cannabidiol for your treasured pet.

Beef flavored CannaLove CBD K-9 Soft Chews contain 2 mg of our full spectrum CBD oil and are the perfect dietary supplement or treat for your pet. They are 100% THC-free, made from non-psychoactive hemp, and will not affect your dog psychologically. As dogs are even more sensitive to THC than humans, finding a product that has no THC is vital. Like humans, animals produce endocannabinoids that act on specific receptors found throughout the body and regulate various physiological roles. Cannabinoids, in this case Cannabidiol (CBD), have the potential to address symptoms of various health problems, in a non-toxic way.

Feeding Guidelines:

Up to 16 lbs: ½ K-9 Chew

17-25 lbs: 1 K-9 Chew

26-35 lbs: 1 ½ K-9 Chews

Over 36 lbs: 2 K-9 Chews

**** Important Information and Dosage for Pet Chews:**

A dog's endocannabinoid system can suffer endocannabinoid deficiencies. Unlike human dosages, pets should be given CBD based on body weight and your dog's response to CBD can vary greatly. It is important to start with a low

dosage and titrate up until you determine the most effective dose for your dog. Adding CBD to your dog's daily diet may help to maintain your dog's comfort and youthful exuberance.

Full Spectrum Cannabinoid Profile:

Cannabinoid (CBD)
Cannabigerol (CBG)
