

Curicyn™ Wound Care Clay

Eastern Technologies

All Purpose

- Helps Reduce Inflammation
- Helps Promote Rapid Healing
- Addresses Bacteria at its Source

Directions for Use

May be beneficial to shave or remove longer hair over or near the affected area. Apply a liberal amount to the affected area, creating a protective barrier. Reapply a liberal amount to the affected area when 'clay' becomes dry and/or becomes visually absent from the affected area. Reapply as necessary until affected area is healed completely. Please note that best results occur upon contact from freshly applied product. Keep container closed and tightly capped when not in use.

Recommended for use on equine, livestock and companion pets.

Use Precautions

For external use only. Contact your veterinarian and discontinue use if adverse conditions develop. Keep out of reach of children. Safe if licked by animal. Not for injection or internal ingestion. Always consult with a veterinarian for unusual condition, or if irritation develops.

Stability

Shelf life is at least 2 years under normal storage conditions.

Disposal

No special disposal requirement. Curicyn is environmentally compatible.

Storage

Store at room temperature away from direct sunlight and heat. Keep container closed and sealed when not in use.

FOR ANIMAL USE ONLY.

NOT FOR HUMAN USE.

Patent Pending
