- Not for human consumption.
- Do not exceed feeding recommendations.

Ingredients

Dextrose, Sodium Bicarbonate, Salt, Glycine, Potassium Chloride, Sodium Silico Aluminate, Blue 1

Storage

- Discard any unused solution after 24 hours.
- Store unused powder at room temperature in a dry place.

Feeding Guidelines

Species	Balance Powder	Warm Water (110°F- 120°F)	Feeding Guidelines
Calf	8 Tbsp (4 oz)	2 Qt (8 Cups)	Feed 2 quarts of reconstituted mixture, 1-3 times daily between milk replacer feedings
Foal	8 Tbsp (4 oz)	2 QT (*8Cups)	Feed 1.5-2 quarts of reconstituted mixture per 100 lbs. body weight, 2 times daily
Lamb/ Goat Kid	5 Tbsp (0.5 oz)	2 Cups	Feed 0.5 cup of reconstituted mixture per 6 lbs. body weight, 2 times daily
Baby Pig	5 Tbsp (0.5 oz)	2 Cups	Offer in a free-choice feeder for 1-2 days during weaning or heat stress
Cria/ Fawn/ Elk Calf	5 Tbsp (0.5 oz)	2 Cups	Feed 0.5 cup per 6 lbs. body weight via free-choice feeder, 2 times daily
Adult Animals Cattle/ Sheep/ Goats/ Horses/ Llamas/ Alpacas/ Pigs	8 Tbsp (4 oz)	2 Gallons	Offer free-choice from a pail during times of dehydration, stress or transport.

Feed during times of stress, dehydration, or digestive upset to help support hydration and electrolyte balance. Add powder to warm (110°F- 120°F) water and stir until completely dissolved. Feed at the animal's body temperature. Do not mix into milk or a milk replacer. Continue regular milk or milk replacer feedings unless otherwise directed.

- Animal body weight varies
