Derma360, a Groom's Hand product, is veterinarian tested and approved for use on some of the toughest and most common skin problems. Featuring an extended-release, medicated film, Derma360 is excellent for treating wounds and dermatological conditions. Simply soothing, highly effective, and easily applied., Derma360 is safe for all livestock and dogs.

Directions:

After preparing a clean, dry treatment area, remove over-cap and aim nozzle towards affected area. Apply once to twice daily until healing is complete. Do not wash treated area immediately after application. Re-apply if inclement conditions interfere. Store in a cool, dry place.

Ingredients:

Proprietary blend of carboxylic acids, viscoelastic polymer, surfactants, glycerin, water.

Caution:

For external use only. Avoid contact with eyes or direct spray away from eyes. Keep out of reach of children. If skin irritation develops, consult a veterinarian immediately. Not for human use or consumption.
