

Potassium Chloride

ICU Medical

For Injection **Concentrate**, USP
20 mEq/10 mL (2 mEq/mL)

CONCENTRATE

MUST BE DILUTED BEFORE USE

Rx only

10 mL Single-dose

For Intravenous Use.

Each mL contains potassium chloride 2 mEq (149 mg). May contain hydrochloric acid for pH adjustment.

4 mOsmol/mL (calc.).

pH 4.6 (4.0 to 8.0).

Sterile, nonpyrogenic.

For intravenous infusion only. Usual dosage: See insert.

Mix thoroughly after dilution. Use only if clear and seal is intact. Contains no bacteriostat; use promptly; discard unused portion.

Use Aseptic Technique

Remove cover from Fliptop Vial and cleanse stopper with antiseptic. Add to suitable solution in an intravenous container. Mix thoroughly after dilution.

Store at 20° to 25°C (68° to 77°F). [see USP Controlled Room Temperature].
