

A hand sprayer without the nozzle is a great way to treat The Rubs[®] and Fly Bullets.

This package contains 22 Face Flyps for use with one Cow Life-Cattle Rub[®]. The polyester Face Flyps wick solution directly from The Rub onto the face, giving effective pinkeye protection and face fly control.

Simply tie the split ends of the Face Flyps *tightly* around The Rub, one approximately every 6 inches. Treat The Rub and Flyps with about 2 gallons of insecticide solution.
