

GASTROGARD[®]
(omeprazole)

**STRESS
HAPPENS.
STRIKE
BACK.**

IMPORTANT SAFETY INFORMATION: The safety of GASTROGARD paste has not been determined in pregnant or lactating mares. For use in horses and foals 4 weeks of age and older. Keep this and all drugs out of the reach of children. In case of ingestion, contact a physician. Caution: Federal (USA) law restricts this drug to use by or on the order of a licensed veterinarian.

JUST BECAUSE YOU CAN'T SEE STRESS, DOESN'T MEAN IT'S NOT THERE

Equine gastric ulcer syndrome (EGUS) affects more horses than many realize. Research tells us gastric ulcers can be found in up to:

| 90% performance horses
| 60% all horses¹

Even beyond affecting your horse's quality of life, EGUS can affect your ability to enjoy your relationship with them.

TWO LEADING RISK FACTORS:

- Episodic feeding
- Stress

Some horses are more prone to stress than others, but for many, even small changes of routine can potentially lead to gastric ulcers.

Horses with EGUS may show obvious clinical signs, such as:

- poor performance
- weight loss
- decreased appetite

However, other horses may only show subtle changes in behavior that, when coupled with known risk factors, lead you to suspect ulcers.

WHY GASTROGARD® (omeprazole)?

NOT ALL OMEPRAZOLES ARE THE SAME

- Compounded, non-FDA approved products, and other alternative treatments may appear to reduce signs, but may not fully heal ulcers.
- GASTROGARD is the one-of-a-kind, patented omeprazole veterinarians and horse owners can count on.

99%

99% EFFICACY HORSE OWNERS EXPECT

A horse's health is no place for shortcuts. Many equine ulcer treatments that look affordable actually aren't in the long run if they don't heal ulcers. **GASTROGARD heals or significantly improves ulcers by up to 99%.³**

A LONG HISTORY OF USE

GASTROGARD is the gold standard in omeprazoles.

- Proven and approved by the FDA to treat and heal equine stomach ulcers.
- Trusted and recommended by veterinarians for decades.

WORKS FOR OWNERS AND VETERINARIANS

You can be confident you are providing the optimum care for your horses because GASTROGARD is proven safe and effective.

- It's a smart investment that often reduces overall treatment cost.

IMPORTANT SAFETY INFORMATION: The safety of GASTROGARD paste has not been determined in pregnant or lactating mares. For use in horses and foals 4 weeks of age and older. Keep this and all drugs out of the reach of children. In case of ingestion, contact a physician. Caution: Federal (USA) law restricts this drug to use by or on the order of a licensed veterinarian.

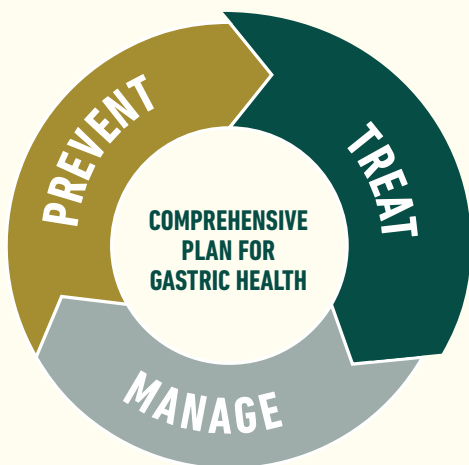

STRIKE BACK AGAINST ULCERS

TREAT WITH GASTROGARD® (omeprazole)

If your horse is diagnosed with EGUS, ask your veterinarian for GASTROGARD — the ulcer treatment you can trust to strike back against ulcers, and enable you and your horse to get back to enjoying the time you spend together.

GASTROGARD® IS:

- Recommended by 95% of veterinarians²
- The only proven safe and effective ulcer treatment approved by the FDA
- A once-daily, easy-to-administer oral omeprazole paste

Maintaining gastric health requires management, prevention and sometimes treatment.

IMPORTANT SAFETY INFORMATION: The safety of GASTROGARD paste has not been determined in pregnant or lactating mares. For use in horses and foals 4 weeks of age and older.

TREAT

If you suspect your horse is suffering from gastric ulcers, talk to your veterinarian about scheduling a gastroscopy exam.

If ulcers are diagnosed, strike back with GASTROGARD.

MANAGE

Continue to manage your horse's gastric health daily. In addition to minimizing stress, here are some helpful tips that can reduce your horse's risk of developing EGUS:

- Provide hay free-choice, utilizing a slow-feed hay net or feeder where possible.
- Consider adding alfalfa to their diet to help buffer acid.
- If concentrate is necessary, provide daily amount in frequent smaller meals, as opposed to twice per day in larger meals.
- Feed hay before concentrate.

PREVENT

To avoid the occurrence of ulcers, identify and anticipate moments of stress, and talk to your veterinarian about the omeprazole dosing that will work best for your horse's needs.

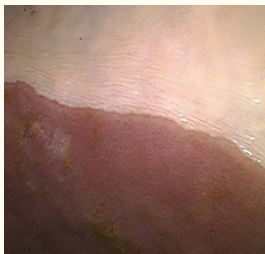

Keep this and all drugs out of the reach of children. In case of ingestion, contact a physician. Caution: Federal (USA) law restricts this drug to use by or on the order of a licensed veterinarian.

IS YOUR HORSE TRYING TO TELL YOU SOMETHING?

This 12 year old Morgan gelding presented for behavioral changes, including bolting and bucking under saddle.

BEFORE: This horse was diagnosed with Grade II Equine Squamous Gastric Disease based on gastroscopy.

AFTER: Following 28 days of GASTROGARD® (omeprazole) treatment, this horse's ulcers were resolved and his behavioral changes significantly improved.

GASTROGARD is a prescription medication available from your veterinarian.
