

AG-TEK® POLE SYRINGES

... for added safety and convenience

Designed for injecting both large and small animals, **AG-TEK POLE SYRINGES** are available in two lengths — a **42 inch "SAFE-T-FLEX"™ POLE SYRINGE** and a **16 inch TAD-POLE™ SYRINGE**. Each syringe consists of a plastic syringe barrel attached to a 16" or 42" flexible plunger. These single dose syringes are available in **10CC** and **20CC** sizes.

AG-TEK POLE SYRINGES provide a safe, fast and simple means of injecting animals in situations where adequate restraint facilities, or space, are not available.

PRODUCT DESCRIPTION	ITEM NUMBER
10CC "SAFE-T-FLEX"™ (42" Plunger)	S100
20CC "SAFE-T-FLEX"™ (42" Plunger)	S200
10CC "TAD-POLE"™ (16" Plunger)	TP100

REPLACEMENT PARTS	SEE PRICE LIST

(PRICE LIST • PAGE 12)

RECOMMENDED NEEDLE SIZES

Large Animals — 12 ga. - 18 ga.

Small Animals — 18 ga. - 22 ga.

IMPORTANT

The syringe barrel is autoclavable (steam sterilizer) to 150°C. **Keep** the syringe plunger **lubricated** with silicone or glycerin. **Rinse** the syringe **thoroughly** with water **after every use** so the product does not dry in the syringe.

DO NOT STORE POLE SYRINGE IN DIRECT SUN LIGHT.
