Pad Heal Extreme Endurance Protection

Pad Heal is to be used on the webbing and pads of dogs that participate in extreme endurance events such as hunting, racing and working dogs.

Pad Heal will do the following:

Pad Heal will condition the webbing and pads so that they become flexible and less prone to injury.

Directions for Use:

Before applying Pad Heal shake the container for a few seconds. Clean the webbing and pads before applying Pad Heal. Simply brush on to the top and bottom surface of the webbing. In addition, brush Pad Heal on to the surface and edges of the pad. DO NOT apply while dog is indoors. Product may stain.

Strengthen and Condition Webbing and Pads:

Apply Pad Heal to webbing and pads once a day during times of extreme endurance and three times a week during training.

Caution:

Keep out of reach of children. For external use only. If excessive irritation develops or symptoms persist for more than 7 days, discontinue use and consult a veterinarian. Avoid getting into eyes or on mucous membranes.

Ingredients:

Raw Linseed Oil, Spirits of Turpentine, Pure Menhaden Oil, Bees Wax, Balsam of Fir and Oil of Vitriol.
