

Equine Artistry+ Medicated Spray

Equine Elite Labs

So many uses!

Effective against deep bacteria and fungus that cause infection, itching and dermatitis on contact! Powerful yet gentle. Does not Sting. Non-Toxic. Safe for animals and handlers.

Active Ingredient: Benzalkonium chloride

Directions: Spray onto itchy or infected skin or wound. Apply once or twice per day or as needed until healing is complete. Bacterial caused itching usually stops with one or two applications.

For bee stings, insect bites & mosquito bites: Saturate a cottonball with the spray and hold on the sting site for 30-80 seconds.

This is not intended to replace veterinary care.

Made in the USA
