FEEDLOT TRIALS PROVE IT. IT PAYS TO USE COMPONENT® with TYLAN.®

- Feedlot performance trials* demonstrate that even when there were few visible abscesses at the implant site, cattle that had been implanted with Component with Tylan performed better than those implanted with the comparable non-Tylan product.
- The result? An extra 5.3 pounds of hot carcass weight per animal.
- The benefit? An extra \$6.00 or more per head when you use Component with Tylan — a minimum return of 20:1.

Maximize your implant investment by implanting with Component with Tylan.
