

Buddex Dehorner

Kerbyl

Dehorning without compromise!

Animal friendly and species appropriate

The unique Buddex Dehorner burner ring reliably prevents horn growth in animal-friendly way.

Fast

The high temperature of up to 700°C on the burn ring dehornes the calf in a matter of seconds. Heats up in less than 4 seconds and the complete process takes less than 7 seconds.

Safe

Only the burn ring becomes hot when pressed against the horn buds. This removes the risk of burning the user.

Convenient

No awkward cables. The battery storage section guarantees maximum freedom of movement during dehorning. One-handed operation makes it possible to hold the calf still with the other hand. Ergonomic housing design. Only slight pressure is required against the horn bud.

Lasting

One battery charge lasts for up to 40 calves.

Scope of Delivery

• Buddex Dehorner • Charger cable 230 v • Charger cable 12 v for cigarette lighter • Detailed operating instructions

Mode of Operation

Press the burner ring against the horn bud and turn it 90 degrees as soon as the dehorner begins to cycle. The pressure warms the burn ring up to 700°C in a matter of seconds. The turning motion gives you a continuous burn ring. The animal then rejects the interior tissue layer as a consequence.

Safety Notes

Warning!

Risk of injury and burning through incorrect use.

- Read the operating instructions carefully before use.
- Use only for the intended purpose.
- Never press against metal.
- Keep away from flammable materials at all times.
- Only store and charge the appliance in a cool, dry place and on heatproof and non-flammable surface.
- Protect from moisture, shock and impact.
- Keep out of the reach of children.
- Only for use by trained personnel.
