“Endovac was first presented to me as an immune stimulant, and we started using it on commingled cattle coming from multiple high stress environments to our ranch. **I saw a higher immune response** in these cattle and started using Endovac on all of our cattle at all five locations. We have a 2,000 head cow/calf operation and 500 head of stockers with ranches in south Florida and south Georgia. **Whenever calves go through the chute, they receive a shot of Endovac.** We currently run between .5% and 1% mortality on our calves. And on top of all that, with the price, you can’t go wrong.”

- Matt Pearce,
Pearce Cattle Company

“ENDOVAC-Beef has been a **Game Changer** for me.

I run a good sized cow-calf operation in addition to starting cattle. **100% of my cattle get ENDOVAC-Beef.** Since using ENDOVAC we don’t have to treat as many cattle for respiratory, or even other common problems like pinkeye and foot rot. I am getting my Pasteurella and the stimulant that makes the vaccine work better with ENDOVAC-Beef. **If everybody knew what I knew, everyone would be using it!**”

- Brad Haun,
Haun Ranch
