

Leather Therapy® Wash

Absorbine

Advanced Leather Cleansing Formula For Natural & Synthetic Leathers

Deep cleans without leaving surface residue
Micro-sudsing action lifts out embedded dirt
Gentle on leather

Leather Therapy® Wash leaves no surface residue, is gentle on stitching, and also cleans saddle hardware. It is a highly effective cleaner and can also be used on nylon halters, leads, wool pads, and galloping boots.

Directions For Use: For regular maintenance, spray Leather Therapy Wash on a clean sponge or soft cloth and apply to leather. For dirty leather, lightly spray Leather Therapy Wash directly on the leather and allow the cleaning ingredients to lift the dirt, then wipe away the lifted soil. Do not saturate leather, a little goes a long way. Because the micro-suds contain beneficial lubricants, it is not necessary to wipe away all excess cleaner.

Test in a Hidden Area First. Will not stain clothing.

Important: Treat new leather gently. Delicate leather dyes take time to set. To minimize dye loss while cleaning new leather, **DO NOT RUB HARD OR USE ABRASIVE CLOTH.**

Care Tip: If leather is not protected, body oils and stains may become permanent and impossible to remove. Lightly clean affected area with Leather Therapy® Wash, then apply Leather Therapy® Restorer & Conditioner to lessen stain.

Use On Suede: Spray lightly and evenly on suede. After cleaning, be sure to lift nap gently with a stiff bristle brush—for best results do this several times during the drying process.

CAUTION: Keep out of reach of children. Keep away from food, drink and animal feeding stuffs. Avoid contact with eyes. In case of contact with eyes, rinse immediately with plenty of water.
