

HEIRO™ Insulin Resistance Supplement

Equine Medical & Surgical

Healthy Equine Insulin Rescue Organicals Veterinary Formula Nutritional Supplement

Elevated Insulin is a major cause of lamellar injury and foot pain

Get your horse back to pasture faster!

Tastes great!

Is this your horse?

- Chronic sore feet
- Rotated on x-ray
- Cresty neck
- Founder history
- On Cushing's meds but still foot sore
- Easy keeper
- Painful feet on hard or frozen ground
- Can't be on pasture
- Senior horse health issues

Directions

From biggest to smallest, all horses get one full scoop.

Regular Schedule: Mix one scoop (enclosed) once a day in morning feed.

First Time Users or If Foot Sore: Mix one scoop (enclosed) in morning feed and one scoop in evening feed for 10 days in a row, then switch to regular schedule.

Note: One Scoop = One Tablespoon
