

Derma GeL® 4 in 1 Animal Skin Care

Veterinus

Moist Environment

Intensive Skin Care

Bacterial Control

Protective Film Effect

Non Stop Rapid & Total Care

Original Swiss Formula

Animal Skin Care

Isotonic hydrogel indicated for intensive and rapid skin care. Veterinus Derma GeL® provides a long term moist environment and a protective film effect to protect against external contaminants. Bandaging the area is therefore not required. Certified non-mutagenic and devoid of cytogenotoxicity or irritant effect on epithelial cells, Veterinus Derma GeL® favors rapid hair regrowth in the original color.

Directions:

Cleanse the affected area daily with warm water or a saline solution only, so as to preserve epithelial cells from irritation. Apply generously two or three times a day, as needed. To help prevent abnormal skin proliferation extend application to the surrounding area. Safe to use for competition, gestation or when licked.

Sealed For Your Protection

Keep cap completely closed at all times when product is not in use—to prevent contamination. Keep in a cool, dark place away from heat or frost. For animal use only. Not for human use. Keep out of the reach of children.
