Advanced Protection Formula

Immune support • Stress protection
Improved glucose metabolism

- Developed by an equine veterinarian to address the negative effects of stress.
- Improves cellular uptake and utilization of glucose—especially beneficial in the management of Equine Insulin.
- Supports proper immune function.
- Supports recovery from injury, illness and training.
- Supports energy utilization.

A water-alcohol extract of: *Eleutherococcus senticosus*, *Rhodiola rosea*, *Schizandra chinensis*, *Echinopanax elatus*.

Directions For Use:

Light to moderate work: 0.5 ml per 100 lbs. body weight daily.

Intense training or recovery: 1 ml to 2 ml per 100 lbs. body weight daily.

For best results, administer directly into horse's mouth or top dress on a small amount of feed.
