

INTERVENE™

ELECTROLYTES & SUPPORT

SUPPORTS AGAINST SCOURS

Formulated to Aid in Recuperation & Faster Recovery from Scours

PROMOTES GUT HEALTH

Functional Proteins Support Intestinal Health & Promote a Faster Recovery

FAST, EFFECTIVE HYDRATION

Electrolytes & Functional Proteins Blend Promotes Faster Hydration

LIFELINE Intervene – Electrolytes & Nutritional Support
Enhanced hydration & nutritional support when calves need it most.

LIFELINE Intervene is a supplement designed specifically for young beef and dairy calves during times when **extra hydration** and **nutritional support** are essential. Intervene delivers **functional proteins, electrolytes, vitamins, and minerals** to support hydration and intestinal health. This easy-to-mix formula provides vital nutrients and fluids to help calves stay strong and resilient.

The functional proteins in Intervene go directly to the calf's gut, promoting normal intestinal health. LIFELINE's natural bovine plasma proteins have been proven to support millions of animals worldwide for over 30 years.

Key Features:

- **Functional Proteins** – Promote gut health, aiding nutrient absorption and supporting overall calf wellness.
- **Electrolytes & Vitamins** – Provide balanced hydration and essential nutrients.
- **Extra Fluids** – Supplies up to 4 quarts of additional fluids daily, helping maintain hydration.

Why Choose Intervene?

- **Enhanced Hydration & Nutrition** – Delivers necessary hydration and nutritional support during challenging conditions.
- **Supports Intestinal Health** – Functional proteins target gut health, encouraging growth and vitality.
- **Long-Term Benefits** – Continues to support gut and immune health even when used after day one, providing sustained nutritional benefits.

Measurable Value

Intervene is a cost-effective solution that supports optimal calf health, positively impacting your operation from the first feeding.

Choose LIFELINE Intervene—nutrition and hydration support when calves need it most.

FEEDING DIRECTIONS

2 Quarts of Warm Water +
7 Tbsp of Intervene

Mix Thoroughly Until Smooth
(1 Minute)

Pour & Feed Intervene

FEEDING GUIDELINES

For optimal nutrition, Intervene should be mixed with water and fed separately from milk feedings. For each feeding, mix 7 Tbsp Intervene with 2 quarts of warm water (105°F/40°C) and stir until completely dissolved. Feed entire mixture to the calf via nipple feeder or esophageal feeder. For best results, feed Intervene twice daily for 5 days, in between milk feedings. Intervene can be fed as individual feedings as a supporting and preventative supplement.

TIPS FOR SUCCESS

- Wait at least 2 hours after the milk feeding to feed Intervene.
- During hot weather or when calves aren't drinking well, consider a nighttime feeding of Intervene.
- Do not feed additional electrolytes to the calf while giving Intervene.
- Contact your veterinarian if you have questions specific to your operation.
