

# LifeLine® Intervene™ For Scouring Calves

*Lifeline Annuso*

## Dairy & Beef

### Hydration & Nutritional Support

Powered by **Functional Proteins**

#### Newborns

need electrolytes & functional proteins

Feeds 1-5 Animals based on condition

Electrolytes and minerals

Provides extra fluids when used

Smooth, easy mixing with water

Helps maintain normal intestinal health

#### Directions

- 2 Quarts Warm Water + 7 tbsp Intervene
- Mix Thoroughly
- Pour and Feed

#### Feeding Directions

For optimal nutrition, Intervene should be mixed with water and fed separately from milk feedings. For each feeding, mix 7 Tbsp Intervene with 2 quarts of warm (105°F/40°C) water and stir until completely dissolved. Feed entire mixture to the calf via nipple feeder or esophageal feeder. May be fed twice daily for up to 5 days.

#### Tips For Success

- Wait at least 2 hours after the milk feeding to feed Intervene.
- During hot weather or when calves aren't drinking well, consider a nighttime feeding of Intervene.
- Do not feed additional electrolytes to the calf while giving Intervene.
- Contact your veterinarian if you have questions specific to your operation.

#### Storage

Store at room temperature in a dry place. Use mixed product immediately—do not store.

#### LifeLine®

#### Watch Them Thrive

Quick visual Response – Highly Palatable – Easy To Use
