

Aqua-Ceph Forte (Cephalexin)

Controls Common Bacterial Infections in **Fish**

Each Capsule Contains:

Cephalexin Monohydrate 500 mg

Directions:

Add contents of one capsule (500 mg) into aquarium for each 20 gallons of water to be treated. Repeat in 24 hours. **Suggestion:** Make a partial water change between treatments. The duration of treatment will depend on the type and severity of infection—it is recommended that extended medication baths continue for at least 5 days, but no more than 10 days. If there is no improvement in 5 days, discontinue treatment. Change 20% of water and use charcoal filter until clear.

Cautions:

For aquarium and ornamental fish only. Not for human use. Keep out of reach of children. Not to be given to fish intended for food use.

Storage:

Keep container tightly closed and in a cool, dry place.

Please read label instructions carefully.

This product exerts a bactericidal action and is used in aquariums for the treatment of bacterial activity.
