

Fiebing's Udder Balm

Fiebing Company

Contains: • Lanolin
• Aloe Vera Gel
• Vitamins A, D and E

Aids in Frost Protection

Udder Balm may be used on teats, udders and other skin surfaces that are exposed to the effects of weather or too frequent washings.

Directions: Udders: Wash and thoroughly dry udder and each teat. Apply Udder Balm liberally and evenly to entire teat and udder area after each milking, being sure to coat teat orifice. Gently massage coated area to work Udder Balm onto skin.

Caution: To avoid contamination of milk, thoroughly wash entire udder and each teat before milking.

Keep Out of Reach of Children. NOT FOR HUMAN USE.

Udder Balm helps provide a barrier against the effects of weather extremes – low humidity, hot or cold temperatures, wind. Daily application of Udder Balm also aids in soothing and softening chapped and irritated skin.
