Natural Cleaning Power!

Natural Goodness

eZall® has combined science and technology with Mother Nature. Now you can have it all, extraordinary cleaning power without harsh chemicals or residue. We bring you the ultimate plant based cleaners from a blend of non-ionic surfactants made from renewable resources.

100% Performance Guaranteed

Directions:

- For cleanliness, disposable gloves should be used by the individual performing the cleaning task. Excessively cold water should be avoided.
- Place a liberal amount of eZall® Sheath Cleaner into the palm of hand and apply into the horse's sheath. Work product into the folds of the sheath. Allow 2-3 minutes for the Sheath Cleaner to loosen smegma.
- Occasionally, smegma will accumulate in a mass in the "blind pouch" above the opening of the urethra in the end of the horse's penis. This resulting "bean" may become large enough to interfere with urination if not removed. Carefully pull the horse's penis out of the sheath to check for this and remove gently with a fingertip.
- After all smegma has been removed, rinse horse's sheath and penis thoroughly with clean water.
- If a horse will accept it, the eZall® foamer can be used for the application of eZall® Sheath Cleaner mixed with water. A gentle, flowing water stream may be used to flush out the sheath.
- eZall® Sheath Cleaner can also be used to clean a mare's udder.
