

# MatingMark Deluxe Breeding Harness

## *Rurtek*

### **For better monitoring of breeding & improved farm management**

World Leader with Unique Design

Loved by Farmers

- Convenient and easy “click in” crayon change. No retaining pins required.
- Wide, comfortable & durable straps with brisket mould for snug fit.
- Fast & simple with the most robust “snap lock” buckles.
- Easy strap length adjustment with trigrilides to secure loose strap ends.
- Low walls on crayon holder for greater crayon usage

### **To Fit the Harness:**

- Straps can be adjusted for length by simply sliding the strap through the buckle.
- Fasten girth strap around animal, leaving short straps and buckles on animal’s back, facing forward from the rings.
- Pass the neck straps between the front legs & position crayon holder on brisket.
- Pull the neck straps up and cross over on ram’s back, fastening left strap into right side of girth strap and right strap into left side.
- Ensure the straps are fastened firmly. Secure loose strap ends by lifting trigrilides to slide straps through.

*Check harnesses regularly to ensure they remain firm and hold the crayon securely on the brisket.*

### **To Insert Crayon**

Remove plastic cover. Slide crayon, narrow end first, into holder until crayon “clicks” past the locking tab.

### **To Remove Crayon**

Hold locking tab down with one hand & push to slide crayon out with the other.
