

Bovine IgG Calf's Choice Total® HiCal

Saskatoon Colostrum

Enhanced Instant Mix

Natural bovine colostrum

To replace or supplement maternal colostrum

For Animal Use Only

Product of Canada

Indications

To replace or supplement maternal colostrum as an aid in the treatment of Failure of Passive Transfer (FPT) in newborn calves.

Directions:

Mix the powder with water (110 to 120°F or 43 to 49°C) and feed within 2 hours of birth. Calves should receive a second feeding of colostrum within 8 hours.

Do not mix with other products, except as specified on this label.
