

No Escape® Huge Fly Reel

Bonide Products

Attracts and captures flies

For stables, farms, barns, patios and more

Contains 1 reel

400 meters (1,312 ft.)

Insecticide Free

This Revenge® Sticky Fly Tape will lure and catch tens of thousands of flies. Use in stables, farms, dairy barns, kennels, zoos, factories, restaurants, patios, tents, garages and more. It is an environmentally safe, non-toxic fly control that you can use everywhere with confidence!

Directions For Use

When hanging your Fly Tape try to keep it about 5" from the ceiling and away from drafts.

1. Replace the empty reel in your system with this new full reel.
2. Place the empty reel onto the ending wall bracket with the hand crank. This becomes your new rewind reel.
3. Thread tape through the pulleys and attach to the new rewind reel.
4. When the exposed fly tape is black with flies, unhook the brakes and just crank out a fresh length of the Tape.

Disposal: When the take-up reel is completely full of the Fly Tape, remove the reel by squeezing the tabs on the center spindle and pulling off. Throw into the trash. Clean up our non-toxic glue with peanut butter or vegetable oil.

Note:

The Revenge Fly Tape hardware (sold separately) contains all the brackets and pulleys you will need to create any pattern to best fit the areas for fly control.
