

Bye Bye Odor® Concentrate Scented

Spaulding Laboratories

Safe for People and Animals

Removes Ammonia, Urine & Manure Odors by Microbial Action NATURALLY

All LIVESTOCK: Horses, Cattle, Sheep, Goats, Swine, Poultry

All PETS: Cats, Dogs, Birds, Gerbils, Ferrets, Rabbits, Hamsters

For Both Indoor and Outdoor Use

4 oz. (118 ml)—Makes 2.5 Gal.

Clean Fresh Smell

Directions for Use

Dilute 4 oz. into 2.5 gal. of water

Pour ½ oz. of Bye Bye Odor (2 capfuls) into a 32 oz spray bottle and fill with clean tap water. For large areas put all 4 oz. in a clean 2.5 gallon pump-up sprayer and fill with cold tap water.

Shake Before Use

Spray a light mist on and around the odor area; concentrate on the places that are, or were, damp from urine or where manure was. Daily use best.

CAUTION

Keep Bottle Out of Reach of Children and Pets

Avoid freezing or heat in excess of 120°F, bleach, disinfectants and chemical drain openers to avoid harm to Bye Bye Odor's active microbes. Wash your hands after use. Bye Bye Odor is not intended to be ingested. Shelf life is 2 years until mixed with water, thereafter use within 60 days.

How Bye Bye Odor® Works

Bye Bye Odor® is a safe, highly concentrated microbial solution that will eliminate a wide range of organic odors associated with manure, urine and perspiration. Bye Bye Odor microbes, when wet, consume or breakdown the urea and other organics that cause the unpleasant smell and unhealthy ammonia build up from confined animal urine and manure. Bye Bye Odor is not a cover up, rather it is an odor eliminator.

Spray Bye Bye Odor in livestock and pet areas where urine and manure odors persist. Bye Bye Odor is great for all animal areas: barns, stalls, trailers, trucks, kennels, cages, as well as tack, blankets, RV black-water tanks, toilets etc. Bye Bye Odor is also great

for kitty litter boxes and removing pet “mistakes” from carpet or furniture. Test in a non-obvious spot first.

Manufactured in USA for Spaulding Laboratories
