**Feeding Directions**

Respond Paste is ideal for times of stress and/or decreased feed intake and is safe for use with antibiotics.

Give 5mL/cc gel for every 150 lb of animal body weight per day, not to exceed 15mL/cc.

**Note:** One click of the dosing gun delivers 5mL/cc. One full pull (three clicks) is equivalent to 15mL/cc.

Place the tube in a dosing gun and remove the cap. Hold the head of the animal in a slightly elevated position and place the nozzle on the back of the tongue. Give the recommended amount slowly, allowing the animal time to swallow.
