### **SHAKE WELL**

**DANGER: FLAMMABLE. CONTENTS UNDER PRESSURE**

**Keep Out Of Reach Of Children**

**Read Back Panel For Additional Precautions Before Use**

**Infused with Vita Hair™ nourishing vitamin package**

### **How do the Vita Hair™ Nourishing Vitamins work?**

**Biotin** vitamin is the first vitamin thought of when considering HAIR GROWTH. The major benefit of Biotin is its ability to strengthen both the hair follicle and the hair shaft, where the hair is produced, which prevents hair breakage and dryness. This is a proven, crucial step in the natural hair growing process. Biotin enriched hair has increased elasticity of the cortex which prevents breakage. This enables healthy, FASTER HAIR GROWTH. Biotin also thickens the hair cuticle providing a fuller appearance.

**Pro-Vitamin B-5** is considered the king of all HAIR CARE vitamins. Pro-Vitamin B-5 stimulates healthy scalp circulation which leads to improved hair health. It coats the hair and seals its surface, lubricating the hair shaft making the hair shine. It possesses superior long term moisturizing properties because of its unique ability to penetrate and nourish the hair shaft.

**Vitamin E** is an antioxidant that stimulates circulation to the skin and supports capillary growth. The skin needs to have proper circulation in order to keep the hair follicle alive and thriving. When there are more capillaries, the circulation improves leading to increased nutrient absorption into the hair follicles, which speeds hair growth.

### **Naturally Healthy Hair...How?**

Revive LITE is created from extra light cosmetic grade plant leaf and seed oils, olive oil and premium lanolin ester emollients to easy penetrate the scalp to stimulate nutrient absorption for faster, healthier hair growth. It is rich in Vitamin E and fortified with the **Vita Hair™** vitamin package. Since Revive LITE is derived from plant-based resources, it is Free of harmful toxins or solvents that could irritate your animal's hide or hair.

### **A science breakthrough for fresh, healthy, hydrated skin and hair!**

Want something lighter for your hair? Revive LITE™ features ALL of the great conditioning properties of the "original" Revive, but in a more refined composition.

Great for any time of year, but especially valuable when hair coats become thinner. It creates added lift and increased hair separation since it does not cause the hair to stick together. You will love how light it feels in the hair with a rich deep shine.

When applied, it lightly coats and easily absorbs into the skin and hair without clogging the pores. Why does this matter? Most products can only coat the outer surface of the hair to add temporary shine. Revive LITE™ however, with its lighter molecular structure, can actually penetrate deep into the cortex of the hair strand to infuse essential nutrients and lipids for the utmost moisturizing and hydrating properties. By absorbing easily into the skin for long-lasting nourishment, Revive LITE™ does not sit heavy outside the skin, heating up your animal. Great for daily hair care or use it at the show as a grooming aid.

**Directions: SHAKE WELL before each use.**

- For daily care, spray Revive LITE over the entire body and legs, comb in and blow deep down to the skin. Let Revive LITE soak into the hair and skin over-night, rinse out in the morning. The hair will look healthier, feel stronger, and have great body. Apply daily depending on hair dryness.
- For show day preparation, spray evenly over the body (excluding legs) the night before show. Comb and blow deep into the hair. Rinse out the following morning with water. You will see freshness and “pop” to the hair.

**Helpful Hint:**

- For cattle kept in a cooler, apply Revive LITE during the day and rinse out before letting out at night.
- For a quick conditioning treatment during hot weather, apply Revive LITE, comb in, blow dry deep into the hair and rinse immediately.

**DANGER: FLAMMABLE. CONTENTS UNDER PRESSURE:** Intentional misuse by concentrating and inhaling the product can be harmful or fatal. Prolonged inhalation may be harmful. Do not get this material in contact with eyes. Keep away from heat, sparks, and flames. Do not puncture or incinerate container. Do not expose to heat or store at temperatures above 120°F (49°C) as container may burst. Avoid exposure of can to long periods of sunlight. Use with adequate ventilation. **First Aid:** EYES: immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
