

Nail Clipper

Andis

Pet Grooming Tool

- Heavy-duty, stainless-steel blades
- Spring-loaded action
- Blades sharpened and heat treated for strength and optimum cutting
- Anti-slip, easy-grip handle for safe and comfortable grooming
- Safety stop helps prevent over-cutting
- Safety lock on handle for safe storage

Ideal for All Size Dogs

Instructions:

1. Hold the paw securely while trimming the nails.
2. Quickly cut off the top of the nail with a single stroke. Be careful to avoid the blood vessel (the quick), as this will cause bleeding.
3. Do not cut off too much at a time. If pet's nails are very long, cut off a small amount and wait a week or 10 days before cutting again. Repeat every week or 10 days until nails are at desired length.
4. Finish up by using nail file to make nails smoother.

This instrument is very sharp. Use with care. Use safety lock when not in use.

Made in Taiwan
